

Viable Solutions: Six Steps to Transform Healthcare Now

Michael Freeman
Healthcare Leadership Council

The Healthcare Leadership Council

- Members are leaders from every sector of healthcare – hospitals, insurers, pharmaceutical companies, medical device makers, distributors, pharmacies and more
- Our mission – a healthcare system that is affordable, accessible, innovative, sustainable and of the highest quality

The National Dialogue for Healthcare Innovation

- NDHI created as a platform to enlarge the consensus-building circle even beyond HLC's diverse membership
- Affordable Care Act addressed coverage. Need to focus on other factors affecting healthcare's future.
- Focused NDHI platform on identifying and removing barriers to patient-centered innovation
- What is achievable now and can address quality, cost challenges?

The NDHI Process

- March 2015 Summit on Innovation and Value involved leaders from over 70 organizations
 - Healthcare sectors, patients, employers, academia and federal government
- Led to formation of three workgroups
 - Patient engagement and adherence
 - Data strategy and interoperability
 - Outdated and ineffective laws and regulations

Six Steps to Transform Healthcare Now

- Improved care coordination to address chronic disease
- Improvements in the federal Medication Therapy Management program
- Accelerated health information interoperability, driven by private sector innovation
- Common-sense FDA reforms to speed medicines, technologies to patients
- Changes to laws and regulations impeding multi-sector collaboration
- Improved access to patient data for quality healthcare, medical research
